First-Class Dressmaking

Tenth Avenue & Main Street S

Blairmore, Alberta

evening last was a huge success.
Under Conductor Leyshon, and
with the piano accompaniment of
Miss Disney the programme was
rendered in a most pleasing man-
ner. Besides the several items
printed on the programme several
other selections were rendered. The
attendance was large.

On Monday night last Blairmore was the scene of the worst conflagrations in the town's history. Fire originated about 11:30 from the rear of the Kallil store, and inside of three hours the Compton Inn hotel, the Kallil store, A. McLeod's real estate office, and B. McDougall's jewelry store were reduced to ashes, while the Royal Bank of Canada and law office of Thomas Ede, were seriously charred.

Fire brigades were summoned from Coleman, Frank and Bellevue, and worked in conjunction with the local brigade to fight the flames. Considerable time was needed to make connections with the different nearby hydrants, and the flames had gained considerable headway before the water was brought to play. In but a few minutes the building, which was stocked with dry goods, was a mass of flames and it was seen that that building was doomed. Attention of the firemen was directed to the Cosmopolitan hotel, the bar of which was next adjoining the Kallil building. Despite the fact that a good force of water was at hand all efforts proved futile in suppressing the flames from reaching the hotel.

The fire entered the big hotel, and in a few minutes this building was a mass of flames from end to end, and all hope of saving it was lost. At the rear of the hotel and adjoining by an annex, was a large pool room and rooming house. The connection was soon torn away and with a free application of water from the Frank hose this building was saved. Across the avenue was the Blairmore hotel. A bucket army was arranged around this building, while wet blankets and other contrivances were used to great advantage around the roof. The east side of the Blairmore hotel was considerably scorched and several windows broken. Outside of this the Blairmore hotel sustained little damage.

Willing hands assisted in removing wares from McLeod's office, the jewelry store, the Royal Bank and T. Ede's premises, while the Frank and Coleman firemen fought the elements on all sides. These buildings were all a part of the same block with the hotel, and it was almost a useless task to think of saving them. However good work was performed by the firemen, especially W. J. McGowan and his force from Frank who are entitled to the highest commendation for the manner in which they performed their work. The flames were kept back from the Royal Bank and T. Ede's store and outside of a serious exterior charring, these buildings were saved. The damage to the latter buildings, which are owned by Mr. Ede would amount to about \$500.

The buildings occupied by Messrs. McLeod and McDougall were owned by Harry Howard, now at Victoria. Nearly all

tiles of value were removed from these and saved. McDougall's safe was opened on Tuesday morning and the contents found in good condition.

The Kallil store contained a large stock of dry goods, boots and shoes, etc., valued at about \$15,000, on which it is understood there is some insurance. The Cosmopolitan hotel was one of the finest hosteries in The Pass, and one of the oldest as well. The building was purchased by Mr. A. A. Sparks about eight months ago and was valued at \$40,000; which we learn was only slightly covered by insurance. Mr. Sparks is the most serious loser, his loss aggregating about \$30,000.

On Tuesday morning, while overhauling the debris, the workmen came across the charred body of a man. The remains were gathered together promptly and placed in a council chamber, where they were held pending an investigation and identity. The body was found to be that of Federico Calabrese, an Italian, who has been working for some considerable time throughout The Pass. It is said that Calabrese was awakened and hurried out of the burning building, but afterwards re-entered and going up stairs made his way to a room bedroom, in the debris under which his baked body was found. It seems that Calabrese had been in quest of some valuable articles which were in his room, and upon approaching the room became suffocated by smoke, and failed to return. He was about 57 years of age, and well known throughout this section of The Pass.

A coroner's inquest was held at 11:30 a.m., Coroner Pinkney presiding. The following jury was impanelled and will bring in their verdict touching the death of Federico Calabrese on Tuesday next: Henry E. Lyon, chairman; Charles E. Hiscock, Louis Dutil, Harold G. Bigelow, John Gaskell-Smith, Donald A. Sinclair and Walter J. Bartlett.

The total amount of damage done is estimated at upwards of \$80,000, upon which there is not more than \$20,000 insurance.

The members of the Coleman, Frank, Bellevue and the local fire brigades deserve great credit for their efficiency.

The public generally exercised a true spirit of sympathy and rendered assistance wherever necessary.

Hundreds of people from Frank, Bellevue and Coleman were on the scene within an hour of the first alarm. The Coleman gong rang out just as a freight train was about to leave for Blairmore, and the firemen of that town were fortunate enough to strike this means of conveyance and reached the scene within thirty minutes. Inside of fifteen minutes McGowan and his men from Frank were on the scene, followed in a few minutes by the fighters from Bellevue.

Fortunately there was not a breath of wind, or the whole of the eastern or western half of the town would have been reduced to ashes.

The concert given by the Cole-
man Choral Union, on Thursday

Blairmore Lodge, No. 68, meets in their Hall, 880 1/2 10th St., every Tuesday at 8 p.m. Visiting brethren welcome.

Happenings in and Around Blairmore

Keep your eye on the turkey in
the Palace Cafe window.

R. Burns, of Gillingsham, paid a
visit to Blairmore this week.

Mrs. H. Gebewill held a millinery
opening in the Sargent block today.

Fritz Sick, of Lethbridge, spent
a couple of days in town this week.

H. C. Morrison and T. H. Shep-
herd, of Cowley were in town Mon-
day.

H. D. MacMillan, of the Cowley
hotel, autoed to town on Friday

Tuesday.

Geo. A. Clair, of the Grand Union
hotel, Coleman, was in town on

Tuesday.

Frayer & Murphy's wholesale
liquor store was opened for busi-
ness last week.

Mayor Ouimet and Postmaster
Marion were down from Coleman
on Wednesday.

R. M. and Mrs. Brisco arrived in
town Saturday. They will reside on
State street.

The remains of Federico Cal-
bresi were buried in the Blairmore
cemetery Tuesday morning.

Professor Taube, eye-sight spec-
alist of Calgary, spent a couple of
days practising here last week.

"The Girl from Rector," at the
Blairmore opera house tonight,
promises to be classy. Don't miss

it.

F. E. Hinde has purchased a
Ford auto and the new machine is
spinning around as wild as real
estate these days.

T. Edw will erect a solid con-
crete wall to the western side of
his block, on Victoria Street, to
serve as a fire break.

B. McDowell has moved his
dry-goods outfit to the Blairmore
dry-goods store, where his business will
be carried on in future.

Real estate is moving in Blair-
more at the present time and during
the past few days considerable
property changed hands.

W. Card put on an excellent
picture show at the opera house on
Tuesday night. The Zhycko-
Gorch wrestling match proved very
interesting.

We received a wireless message
from Tia Juana, Mexico, last
week, confirming the report that
Mr. J. Frost was the real discoverer
of the North Pole.

Thompson & Co. will open today
as successors to the firm of Mar On.
Several improvements have been
made in the front appearance of
the business block, and all round
renovations have taken place.

The sale of work given in the
Bulld building last week by the
Ladies Aid of the Central Baptist
church was a great success, \$112
being realized. The ladies wish to
thank all those who so kindly
helped to make the sale of work
and a success.

The concert given by the W. C.
T. U. and Band of Hope in the
Central Baptist Church on Monday
night was a grand success.
Mayor Lyon occupied the chair and
the programme was long and
interesting reflecting great
credit upon the children, the
promoters and Miss Green as
trainers.

On Monday afternoon Blairmore
was the scene of a big runaway.
Several teams which had conveyed
parties to the cemetery from Frank,
were caused to frightened and start
for home. They maneuvered a
right-of-way all through Blairmore
and out towards Frank, and de-
spite the fact of the streets being
unusually crowded with people at
the time, no accident occurred to
humanity. One vehicle was up-
turned shortly after starting out,
two others got through to Frank
safely, though the hood of one
vehicle was considerably shattered.
Another turned over after crossing
the second bridge.

Blairmore, Alta., Thurs., Mar. 28, 1912

EDITORIAL NOTES

Blairmore was raided by in-
surance agents, sale agents, etc., on
Tuesday. Put one in mind of
prairie wolves after a fallen horse.

Monday night's fire in Blairmore
provided to advantage the value of a
good water supply and the neces-
sity of good fire-fighting apparatus.
Had Blairmore been the possessor of
a well-equipped fire-hall and a
thoroughly organized brigade, in
all probability the fire would have
been confined to the hall itself and
the exposure ruins that now
present themselves to view would
have been averted. Had such a
fire taken place about a year ago,
before Blairmore had installed a
water system, there is no doubt in
the minds of anybody that this
beautiful town would have been
reduced to ashes.

It is time we should appreciate
the steps being taken by the town
council towards the construction
and equipment of a centrally located
fire hall, where could be
organized a resident fighting brigade.

If the present ruins are not the
result of an effort on the part of a
fire-bug, but rather caused by a
spark dropping into rubbish at the
rear of the buildings, it is about
time steps were being taken to
have the back yards cleaned up of
all inflammable material and the
chance of a repetition from such a
cause averted.

It is time we should appreciate
the steps being taken by the town
council towards the construction
and equipment of a centrally located
fire hall, where could be
organized a resident fighting brigade.

They are shocked by a situation.
Although it is extremely funny to
the audience, it is very humiliating
to them, and they decide to punish to
groom by a plan that in getting his
bride, and severing the ties that
bound him to the girl of the Bohemian
days.

The present company has been
engaged to produce "The Girl From
Rector," this season is one of the
best of New York City. Miss Kath-
rine Raymore is the leading spirit in
the part of Louise Sedaine. She is
refreshingly original and her cleverness
makes a decided hit. This Girl
From Rector is a curiously composite
creature to start with. With Miss
Raymore interpretation is more than
skillful, not only in the emotional but
she is a very rapid lady of the "highs"
and also the wife can be hasty, as well.
Miss Alice Seymour displays
a decided bias of acting from the
part of Marcia Singleton. The rest of
the company are composed of the following
names: Thomas H. Wallace,
Graydon Fox, Harry B. Carle,
Katherine Raymore, Ed Thompson,
Carey Hastings, Alice Seymour, Anita
Allen, Ralph Thomas, Henry Penny-
packer, Claude Robinson. The
company carries special scenes and
accessories for a first class production.

Prices 75¢ and \$1.00.

The Acquisition of Riches

To get rich at all hazards, and to
get rich quick if possible seems to be
the object to which most men are
bent, bending their energies now-a-days.

If it were not so, many a man who
is now able to prey upon the credulity
of his fellows would be compelled to
seek other employment.

The Chief Post Office Inspector of the City
of New York reports that last year
"Members of the Stooges" lost
seventy seven millions of dollars in
vesting in the get-rich-quick scenes;

and it is safe to say that all the
"suckers" were not caught on the
other side of the line. The man who
goes through life "taking a flier" at
this and that under the impression
that he will some day "strike it rich"
in 999 terms out of 1000 only wants
to waste his money and making rapid
preparation for an ignoble of humili-
ation and penury.

The sooner he awakens to the fact that there is no
certain short cut to riches, and that the
"lucky accident" does not happen to
one in one thousand, that better will
be for himself and his family.

The only safe place to adopt, if he
hopes to have a competency in his
old age, is to live within his income
and to systematically lay up some
thing from his earnings, no matter
how small the amount may be. If he
is living beyond his means he should
be honest in mind.

Macaw's statement
which we something like this: "In-
come 20 shillings expenditure 20
and 9 pence result misery;
income 20 shillings and 1 pence
expenditure 20 shillings result hap-
piness. If he cannot do more, he
should make absolutely certain of an
age of comfort and happiness,
which he may do if he will avail
himself of the opportunity presented
by the Canadian Government Annu-
ities Act, regard to which information
may be obtained at any Post
Office or on application the Super-
intendent of Annuities, Ottawa. There
is no other plan for the purpose
which will be more satisfactory
and safe than this. So long as he
is in Canada, whether he is naturalized
or not, he is eligible to make the pur-
chase.

When you have rheumatism in your
foot or hip, apply Chamblain's Liniment
which will cure it in a few days. Price 25¢ a box, or two for
50¢. Mailed to any address. The Scofield Drug
Co., St. Catharines, Ont.

The Girl from Rector's

At the Blairmore Opera House on

Thursday, March 28 will introduce

a girl born in France under another

name. The Girl from Rector, a

mischievous but harmless creature,

has been adopted to this country by

Paul Potter who in the importing

process has constructed what is said

to be one of the most laughable far-

comedies ever produced. "The Girl

from Rector" which is coming to

the Blairmore Opera House is an

adaption from the French. In its

natural state it ran for over two

years in Paris and was still tickling

the risibilities of the Parisians.

It has been translated into several

languages and the Germans are all in

a flutter over this comical comedy.

Even Denmark, the land of Ibsen, is

being amused by it. It remained to

acclimate this comedy to America

and it is surrounded by an excellent

company of artists, it was an instant

success and ran for

more than a year on Broadway.

The company that is to produce

it at present is one of exceptional

ability composing as it does several

competent New York favors.

Miss Katherine Raymore as Louise has a

most enviable reputation in a number

of farces which she has indent

with, and the associated players

are one and all of well known

competency.

A story of "The Girl from Rector" which Paul Potter has made

into such a delightful comedy, is as

follows: Louie Sedaine, a dancing, dash-

ing piece of humanity in love with

Richard O'Shaughnessy, a young

richard of ample wealth, who, at the

opening of the play, has plunged into

disgrace as a result of the influence

of Col. Andrew Tandy, whose head

quarters is at the famous Broadway

restaurant. Richard has wearied of

bachelor life and welcomes the visit

of Mrs. Gen. Witherspoon Copley, of

Battle Creek, Mich., and her daughter

by her first marriage, Miss Marcia

Singleton.

They are shocked by a situation.

Although it is extremely funny to

the audience, it is very humiliating

to them, and they decide to punish to

groom by a plan that in getting his

bride, and severing the ties that

bound him to the girl of the Bohemian

days.

They are shocked by a situation.

A RARE OPPORTUNITY FOR LIVE INVESTORS

Lake City

Is the name of the Western Terminal Point of the proposed Crow's Nest Pass Electric Railway and is already tapped by the Pass line of the C. P. R., while the G. N. R. has already approached to within a few score of miles and must eventually pass through this admirably located town.

Lake City

Is located by the shore of Crow's Nest Lake, only a few miles east of the provincial boundary between Alberta and British Columbia, and just north of the international line. In reality, it is at the top of Canada where the majestic Rockies tower in serene magnificence over great chasms and numerous fjords, reflecting their presence on the waters of this beautiful lake. Here also are afforded the very best tasks for the daring mountain climber and for huntman who desires to outrival the quiet ways of the Rocky Mountain goat, sheep, deer or elk, which are the monarchy thereon. In close proximity are numerous timber, mineral and fuel resources, development of which is now in its initial stages. These resources include gold quartz, coal, iron and pulp wood.

Crow's Nest Lake has long been looked upon as a promise as an admirable location for health and tourist resorts, and but now this promise is being realized. Plans for hotels, etc. are being arranged, as well as boat houses, and the most modern pleasure yachts will soon glide over the surface of this beautiful lake.

But a few weeks ago lots were placed on the market, and the agents have had their hands full attending to purchasers. Prices run from \$150 up. For further particulars apply to the agents:

DR. CHASE'S

KIDNEY - LIVER PILLS

Overeating is the great cause of liver troubles, biliousness and constipation. The digestive system becomes fatigued and overtaxed, the liver fails and then follow kidney disorders of the most painful and fatal form, such as rheumatism, Bright's Disease, etc.

The beginning is almost invariably with the liver and should be overcome by the prompt use of Dr. Chase's Kidney-Liver Pills before serious disease is developed.

An occasional dose of Dr. Chase's Kidney-Liver Pills when the liver gets sluggish and the kidneys fatigued will keep the whole digestive system in healthy working order.

It is remarkable that thousands of people have found relief by their experience and would not think of health without this medicine in the house. Others have been restored to health by this treatment after their kidneys reached more serious and complicated stages.

This does not seem to be any medicine obtainable which is so successful in awakening the action of both liver and kidneys as Dr. Chase's Kidney-Liver Pills. Most also can account for their remarkable sales.

Dr. Chase's Kidney-Liver Pills, one pill, dose 20c a box, at all dealers or Edmundson, Bates & Co., Limited, Toronto.

The Beaten Path

Sergeant—How do you think this dog was stolen from a lady?

Policeman—Because as I walked down the street with it, it stopped in front of all the department stores in town.

A MODERN MEDICINE FOR THE BABY

What mother cannot remember the times of her childhood when the doctor or oil bottle was brought into use—the dread with which she looked forward to a dose of it, the fight she put up when she knew it was in store for her! All mothers will be glad to spare their little ones this discomfort—this dread. Mother Nature has furnished the bad smelling extracts of gruel, the oil and oil given in its place a modern remedy—a remedy pleasant to take, mild in action, safe in use, absolutely harmless and something the little one won't dread. That medicine is Baby's Own Tablets—the only medicine that can be given to a baby. It is a little easier—the medicine that has forced Castor Oil and "soothing" syrup out of the home and has taken their place. The tablets are a joy to the parents. The Tablets are sold by medicine dealers by mail at 25 cents a box from The Dr. Wills—Medicine Co., Brockville, Ont.

"I wonder if your sister realizes, Johnnie, during the last three months I have spent many dollars in sweets on her?"

"I am sure she does, Mr. Sweetby; that's why she's not letting on she's engaged to Mr. Brigitte."

Minard's Liniment Cure Dantruff.

Teacher—What is a man-o'-war? Boy—A cruiser. Teacher—What makes it go? Boy—It's a wind. Teacher—Who are on board her? Boy—It's crew, sir. Teacher—You're a very smart boy. What were you born? Boy—Cross slit.

The following conversation followed a bus ride recently—

Mabel—How's your brother a success? Gladys—Yes, indeed, the minister will have cause to be very grateful. Mabel—How much were the profits? Gladys—Well, I don't know exactly, but ten of us got engaged, and the minister is in for a good thing, a wedding fees.

New South Wales possesses sixty-six friendly societies, with a membership of 161,000.

Motherhood

is the highest type of womanhood.

Scott's Emulsion

is the highest type of curative food.

The nourishing and curative elements in Scott's Emulsion are so perfectly combined that all (babies, children and adults) are equally benefited and built up.

Be sure to get SCOTT'S—it's the Standard and always the best.

QUEER WEATHER DEVICES

Nature Has Furnished Many Simple But Interesting Ones

One of the oldest and simplest ways of telling whether the air is dry or wet is to open a bottle and leave it out of doors, or even in an apartment where there is no artificial heat. The water is dried and dry at the top of the bottle, while the water at the bottom is moist when rain is likely.

A common toy, the Swiss weather house is really quite trustworthy in its predictions. It emerges from the little house in fine weather, while the man comes out when wet conditions are to be expected.

In a medium state of the atmosphere both figures stand just inside the house. The movements are due to the twist of a cord of gutta-percha substance which is highly sensitive to changes in the humidity of the air.

Two very singular weather devices are the frog and a leech. They are employed. In the former case a glass jar is filled about two-thirds of its capacity with water. A little hole is made in the bottom, and this is placed inside the jar.

A frog will live quite happily in a position for a few weeks, and it will climb up the glass when the creature will climb up to the top of the ladder. In stormy weather, however, the frog will remain under the top of the ladder.

Even more reliable as weather prophets are leeches. A single leech is placed in a broken glass bottle, and it will crawl out on a cord of gutta-percha when the weather is bad.

The approach of fine weather is cooling the creature rises to the surface, which is coming thunder, while it will leave the leech when the water is too sensitive to the animal to an electrical disturbance.

The chameleon barometer is a curiosity which has puzzled many people, but its construction is really very simple. The creature will crawl out on a cord of gutta-percha when the weather is bad.

A cardboard mount is prepared, and this may be lettered in sections, Fair, Storm and Change. The chameleon is then mounted on a board, and the mount is then immersed in a solution of chloride of cobalt, to which are added chloride of sodium and gum arabic. Any chemist will make up this mix.

A more beautiful chemical storm-glass is formed of a flower-shaped glass tube, which has been stopped but with a small hole through the cork. Into the tube has been poured a mixture of cobalt, ammonia, alum and water.

The chameleon is in the state of the atmosphere indicated by the production of feather growths, the oil and glass in its place a modern remedy—a remedy pleasant to take, mild in action, safe in use, absolutely harmless and something the little one won't dread. That medicine is Baby's Own Tablets—the only medicine that can be given to a baby. It is a little easier—the medicine that has forced Castor Oil and "soothing" syrup out of the home and has taken their place. The tablets are a joy to the parents. The Tablets are sold by medicine dealers by mail at 25 cents a box from The Dr. Wills—Medicine Co., Brockville, Ont.

A very bold-headed man went into a barber shop in Ottawa, and plumped himself down in the chair, said "Hair Cut!"

The barber looked at him for a moment and said: "Replied: "Why, man, you don't even have a hair cut. What you want is a shave."

POWER of the Potato

Potatoes will soon form the power for driving all kinds of engines. How can they do this? By the alcohol which can be extracted from fresh potatoes.

Alcohol, or spirit, is produced by the fermentation of sugar. Potatoes contain a large amount of starch which can be turned into sugar by the addition of malt. When the starch has been converted to sugar, yeast is also added, and the sugar is then fermented.

At present, potatoes are worth, roughly speaking, 35 cents per bushel, but turned into spirits they would be worth over \$1,000,000 annually.

It is estimated that a pint with a daily consumption of eight thousand pounds of potatoes would cost approximately \$12,500.

A Thorough Pill—To clear the stomach and bowls of impurities and irritants is necessary when they are in a bad condition.

The pill that will do this work thoroughly are Parnefice's Vegetable Pills, which are mild in action and light in results. They are large painless and swellings are quickly removed, and this is placed inside the jar.

A frog will live quite happily in a position for a few weeks, and it will climb up to the top of the ladder. In stormy weather, however, the frog will remain under the top of the ladder.

"What seems to be the matter with him?" asked the doctor as he approached the bedside of the man, who lay swathed in bandages.

"He found the gas-leak," briefly explained the nurse.

"Shiloh's Cure quickly stops coughs, cures colds, heals the throat and lungs." 25 cents.

A very bold-headed man went into a barber shop in Ottawa, and plumped himself down in the chair, said "Hair Cut!"

The barber looked at him for a moment and said: "Replied: "Why, man, you don't even have a hair cut. What you want is a shave."

Canada BEATS THE UNITED STATES

MORE HONORS FOR GIN PILLS

Holyoke, Mass., U.S.A.—Having taken two boxes of the new Gin Pills, I am well again, and I am quite satisfied with the results. I gave an order to my druggist about three weeks ago for a box of Gin Pills, and he had not come yet and I had to borrow a box from a man who also is using Gin Pills. We have now left, and am sending you \$1.50 for the box, which I would ask you to send to me as I am not quite so well when I am without GIN PILLS.

A somewhat curious storm-glass was introduced by the late Admiral Fitzroy. The tube is of a glass tube, stopped but with a small hole through the cork. Into the tube has been poured a mixture of cobalt, ammonia, alum and water.

THE ENTERPRISE, BLAIRMORE, ALTA.

SILAS OF HEBRON VALLEY

A Wall Street Deal and What It Brought Him.

By M. J. PHILLIPS.

John G. Davidson, with his cleanly shaven, comely face, chest chin, blue eyes and firm jaw, might have been from appearances an actor. He might have been mistaken for a popular preacher or a professional baseball player. His age was apparently anywhere between thirty and fifty years, and the air of good living and prosperity which the man of the world is supposed to wear.

All guesses as to his profession, however, would probably have gone wide of the mark. He was senior member of the firm of Davidson & Co. of Wall street, a firm which bore a rather sharp resemblance to the one which was hurrying home from a hunting trip in Maine, which had been cut short by the tip,慷慨地 received, of a big "killing" to be made the next day on the Stock Exchange.

John G. Davidson, a Cole boy preparing to come into several hundred thousand dollars because the Hillman and the Silvers were about to close in a death grapple for the control of the New York and Western. Each faction held about one-third of the stock. Speculators and investors held the other two-thirds, and the Silvers had the best of it. The Silvers needed the road. It was said, to stifle its chances of becoming a dangerous competitor. The Hillman crowd despised it for those very possibilities.

The stock was down to 37, but according to the information gleaned by the broker, the Silvers were prepared to pay 150 if necessary for the shares constituting the balance of power.

Despite the suspicion which attached to him on Wall street, Davidson's face was one people instinctively liked and trusted. He was a man of the public point. Silas Ashlar entered the smoker of the train, shaking the snowflakes from his sister—it was midwinter and storming—he took the seat beside the broker.

Ashlar was twenty-five, and his good nature was unclouded by the memory of his life, was round and immature, yet with it there was none shrewdness in it and frank honesty.

Davidson was a man to inspire not only confidence, but confidence. Besides, he was in the road for success. In the course of his work, however, the country youth was unshakingly himself to this agreeable stranger as he had never talked to his closest friend.

"I see," rejoined Davidson politely. "Silas beat a tattoo on himself, under his coat, when he was a boy, with embarrassment before he proceeded. "There's a girl, you know."

"Indeed, Briggs' daughter, I suppose?"

"No; Jenie Gardner. We're—we're engaged to her see. That's why I want the stars."

"Feel as if you ought to be set up in business before you marry, eh?" queried the broker, smiling a little.

"Well, no; I don't," replied the young man reluctantly. "And Jenie don't; nor do I. We're not engaged. It's Mr. Jenie Gardner, the banker there at Hebron—he don't like me; I don't got money enough, I guess. Then there's another fellow, the postmaster, he wants Jenie to marry."

Davidson's interest quietened. "Why don't you run away with the girl?" he asked.

"She won't do it. She's afraid of her father. She is her mother, for that matter."

"He'd be satisfied to let you marry if you owned the store?"

"Yes; he's got some more of his meanness," returned Silas. "He thinks it's impossible for me to buy it or he wouldn't say so. All I got \$500. Briggs wants \$2,000. I'm going down to New York to see if I can't raise it. I've heard of money being made pretty quick in Wall street."

"They're set your hay in about twenty miles on Wall street," responded Davidson decisively. "I know, because that's where I hang out. But see here, Ashlar. I've got a little sporting blood in my veins, and I've been a dog master. Suppose I help you down this 'poner banker?"

"Say, if you only would!"

"Very well. Let's have your five hundred. There's something on for tomorrow, and maybe I can clean up you're not here during the examination. Are you going to trust me and take the chance?"

Ashlar's answer was to draw, with trembling fingers, a bulky envelope from an inner pocket and pass it over to the broker, who held it open and counted the money, then despatched. There was \$200 in the package, in well-thumbed tens and twenties.

The broker stowed the money away and produced a bit of pastebord. "There's my address," he said, handing the card to the boy. "I'll be back to you sometime after tomorrow at 10, and I'll have some news for you."

When at dusk Ashlar, bewildered by the appalling noise and confusion of the big city, ventured from the railway station into the street he was suddenly hit that he had done a foolish

thing in introducing as the money to a perfect stranger, and the remembrance of Davidson's face with its undeniably attractive reassured him. "I was a darn fool for ever thinkin' of this thing," he muttered. "They'd surely been mad if I'd been spurned by my girl."

The New York and Western episode on the Stock Exchange next day was merely a skirmish in the great industrial warfare which goes on ceaselessly in that city, the struggle called "trusts," for which the stock market was ruined. Before Davidson & Co. had loaded up, irresolutely with the stock, Davidson smelt danger and had begun to let go.

The stockholders proved justified. The stock market for control of the New York and Western was a clever fake, which had already caught many small firms. It developed that the Silvers and the Hillmans had long since come to an amicable agreement in regard to the road.

"I see you're about \$65,000," said Lucine Cole, the morning after the skirmish as he sat with his partner in their private office.

"About \$70,000," agreed Davidson. "And if I hadn't got wise until a half hour ago, we'd have been down and out today."

A clerk ushered in Silas Ashlar. The country youth was baggage with mixtures. "The morning paper says we were hit hard," he began. "My money's all right," interrupted Davidson.

"Your money's all right," responded Davidson. "I had your little old \$2,000 salted before the balloon ascension. Here's your check." He handed Ashlar a slip of paper.

Silas for a few moments was dazed by the good news. "They're to be beat," he said to himself, and then he was moved thereat. "Not a word now, Silas. I want just two promises of you—that you'll never mention with the Stock Exchange again and that you will go home and fit up a wedding chamber for me when you get back."

The two were tears in the young man's eyes. "It's Jenie says the word we'll be married inside of twenty-four hours. This money's yours," said his father up. "I don't want any more Stock Exchange money. I know you'll be all right now, Mr. Davidson. I've got the last two thousand dollars to you."

They were tears in the young man's eyes. "It's Jenie says the word we'll be married inside of twenty-four hours. This money's yours," said his father up. "I don't want any more Stock Exchange money. I know you'll be all right now, Mr. Davidson. I've got the last two thousand dollars to you."

A dark cloud mounted. Cole's thick neck and overpassed his face as the grating. "An' I'm a Davidson!" he demanded angrily. "What the devil did you give up that money for? The fool bayside would have believed anything you told him!" Although meant as a sarcasm, a note of anxiety crept into his chin, excited voice of the next question, which was coming along, and was not to be stopped.

"It's yet to be proved also that a white Holland mother turkey can't see."

EVERYBODY'S SNUG.
The cold is driving most outside.
But Bloddy is all right.
No draft can hit her in the spine.
She's snug and warm tonight.

IT'S DOWN TO ZERO, AWFUL COLD.
The cold is driving most outside.
In her tight stall on a dry bed,
Horned cattle tucked around.

THE SNOW IS DRIFTING AWFUL DEEP.
It's cold, it's cold, it's cold.
The snow is drifting awful deep,
In her stall.

IT'S SNOWING OUT OF SIGHT.
They sleep on a dry bed of straw
In their clean and tight stall.

I'M SLEEPY; THAT'S ALL.
The cold is driving most outside.
I'm sleepy; that's all.
I have just all snug as a bed.

THE WHITE HOLLAND TURKEY.

The first White Holland are said to have been bred in Holland over a hundred years ago and brought to this country by the Dutch. They are said to be the original turkeys taken to the old world over 400 years ago and at first were small and delicate.

They made them unpopular with breeders of market turkeys, for a small white bird is not as good as a marketable specimen. An American turkey breeder at once got busy and crossed them with white sports from the Mammoth Bronze, the giants of poultrydom, and this infusion of new blood not only made them harder, but built them to a size very popular at market, as will be seen by the new standard weights for this beautiful variety.

They are as popular as the Bronze and fit the often called "Bronze" or "White" turkey.

DIARY OF A MERE MAN.

OUT to Baby and Absent Wife Triumphant over Tamper.

MONDAY—Eleanora has just gone to another of those horrid suffrage meetings, and I am left alone with our little one. How long some I am and how little I dreamt that my life would be to go to these meetings! I have made violent love to a girl a year ago! Her promises were so fascinating! But now, alas, everything is changed! I have the child and child food, and I am left alone with our little one. How long some I am and how little I dreamt that my life would be to go to these meetings! I have made violent love to a girl a year ago! Her promises were so fascinating!

HOUSES IN ENGLAND.

Hot In Summer and Seldom Really Warm in Winter.

The Englishman is always surprised by his climate. And you may find that surprise on the face of the man who never prepares for anything but a cold winter.

The Englishman has built his house on the assumption that it is never going to be either—just temperate. In hot weather he does not think of electric fans, and in cold weather he shuns the cold air.

Hot Mary Worley Monroe, found in Vienna that life would be inferior in December without fires and stores.

She is surprised at "our

THE WINTER EGG BASKET.

All hens that don't lay winter eggs got the as poultry population would take big drops, but these were treated by the simple method outlined here.

"The Winter Egg Problem" came as article in a poultry journal. There is

no winter egg basket.
